

Materials Management Logistics Guidelines

For sometime many Original Equipment Manufacturers (OEM) Customer Specific Requirements for ISO/TS16949 have mandated organisations comply with the Materials Management Operations Guidelines Logistics Evaluation (MMOG LE).

MMOG LE is an assessment tool that can be used to identify weaknesses in an organisations logistics process. The requirements are broken down into 6 chapters and 206 criteria.

SMMT Industry Forum has been working with a global group to further develop the requirements and is developing a training programme to help organisations understand the requirements and improve their logistics process.

More details on this will be announced in the next newsletter but if would like more details please contact jeff.turner@industryforum.co.uk
