

Delivering business success through the continuous improvement of the capabilities of people and process

ISO/TS16949 Management System Auditing

THE NEED:

Auditors have a significant role to play in ensuring that internal business management systems are implemented and maintained in an effective and efficient way. The competence of the auditor is therefore essential in ensuring that this objective achieved.

THE SOLUTION:

Auditors participating in the Industry Forum auditor training session will be introduced to best practice process approach auditing techniques such as the 'Turtle Diagram'. Training sessions incorporate a 'learn by doing approach' based on case studies and practical exercises. Those participating in the training sessions will have a unique opportunity of being taught by trainers with practical industry and auditing experience.
