Delivering business success through the continuous improvement of the capabilities of people and process

# ISO/TS16949 Management System Awareness, Gap Analysis and Implementation Support

## THE NEED:

Senior management have the responsibility and authority to lead the organisation through the development of a business management system incorporating a wide range of differing requirements including Quality, Environmental and Health and Safety.

## THE SOLUTION:

Those participating in the management awareness sessions, delivered either off site with a mixed group of on site with the complete organisations management team, will be able to demonstrate a clear understanding of their role and the main issues in terms of effective implementation.

Industry Forum can also offer a completely independent gap analysis service to help you establish the status of your current systems and identify actions that would be required to meet the requirements of the relevant standard. The duration of the gap analysis would vary dependant on the size of the organisation but typically can range from 1 to 5 days.

Once any shortfall in systems are identified Industry Forum can provide a tailored implementation support service to help organisations address the gaps and develop an effective process based management system.

skills >> productivity >>> competitiveness >>> profitability
