

APICS CPIM Training

In an increasingly complex global environment, operations and supply chain professionals must consistently update their skills and knowledge to meet the ever changing competitive challenges of their organisation. APICS is the leading professional association for supply chain and operations management offering certified programmes that are recognised worldwide as the standard of supply chain management excellence by organisations, educators and professionals.

APICS CPIM Certification

The APICS CPIM (Certified in Production and Inventory Management) designation demonstrates professional knowledge and understanding of production and inventory management.

The programme focusses on an organisation's internal operations and provides a comprehensive view of materials management, master scheduling, forecasting, production planning and much more.

Join over 100,000 professionals worldwide who have gained CPIM certification.

APICS CPIM Modules

The APICS CPIM programme is divided into five process orientated topic areas to provide participants with the best possible educational assessment and knowledge base.

1. Basics of Supply Chain Management

The basic concepts in managing the complete flow of materials in a supply chain from suppliers to customers. Supply chain concepts are introduced and basic terminology emphasised, as are relationships among activities in the supply chain.

2. Master Planning of Resources

The topics of demand management, sales and operations planning and master scheduling are examined in-depth.

3. Detailed Scheduling and Planning

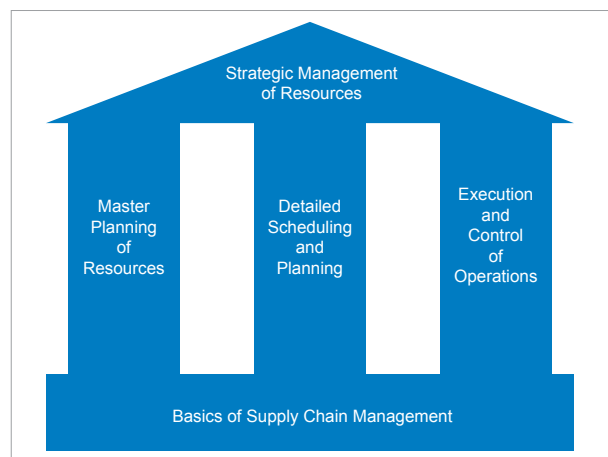

Inventory management, materials requirements planning, capacity requirements planning, procurement and supplier relationships.

4. Execution and Control of Operations

The principles, approaches and techniques needed to schedule, control, measure and evaluate the effectiveness of production operations.

5. Strategic Management of Resources

Strategic planning and implementation and a look at how market requirements drive the resources and processes of an organisation.

APICS CPIM Training

The Benefits of CPIM to the Individual

With an APICS CPIM qualification individuals will:

- Improve efficiency across the processes of their organisation's supply chain
- Increase profitability by optimising their organisation's inventory investment
- Maximise ROI on systems and technologies
- Predict outcomes more accurately
- Amplify functional knowledge of production and inventory management
- Achieve greater confidence and industry recognition
- Have accelerated career development and better employment opportunities

The Benefits of CPIM to the Organisation

- Create a common understanding, vocabulary, processes and frameworks within their organisation to address their supply chain challenges and opportunities
- Proven knowledge and organisational skills to strategically streamline operations
- Tools to effectively manage global supply chain activities where suppliers, plants, distributors and customers are located around the world

Industry Forum, your APICS Channel Partner

Industry Forum is an approved APICS Channel Partner offering the full range of module training in the CPIM designation.

Our trainers are expert practitioners with hands-on industrial experience and highly developed communication skills. They have a wealth of technical expertise and often provide on-site advice and coaching. During every course we will encourage collaboration and sharing of practical experiences, ensuring learning can be put into context and empowering delegates to apply their new skills successfully in their workplace as well as making sustainable improvements.
