

Experience world-class manufacturing like you've never seen it before

Japan Best Practice - Study Tour

This programme provides professionals from manufacturing and process industries, with the opportunity to visit Japan and experience world-class manufacturing first-hand, with plant visits to the Tokyo and Nagoya, along with further visits to the Toyota Museum, and a JIPM-led seminar on the subject of 'Advances in TPM: Karakuri Kaizen, Industry 4.0 and Asset Management'.

When does it take place?

The programme runs from Sunday 10th November until Friday 15th November 2019. It is recommended that delegates should arrive in Japan on Saturday 9th November 2019.

What are the benefits?

Japanese industry is globally recognised as being the world leader in its approach to continuous improvement, having pioneered methodologies such as Lean and Total Productive Maintenance. Through Industry Forum's unique heritage and links with Japanese industry, this programme offers unprecedented access to senior management and the shop floor of world leading companies.

The week-long programme aims to stimulate ideas and share best practice through real-life

scenarios and learning. Having run many times before, the programme is proven to provide delegates with the vision of how to achieve measurable improvements within their own organisations.

Additional benefits include chance to network and share experiences with other delegates on the programme and one to one time with Industry Forum's expert team.

Who should attend?

The programme is designed for Senior Managers and Executives responsible for leading on the implementation of best practice within their organisations. The programme would be beneficial for delegates from both manufacturing and process industries.

Examples of people who have benefitted from attending this programme in the past include:

- CEOs and Manufacturing Directors
- Plant Managers
- Senior Operations Managers
- Continuous Improvement Managers
- Senior Programme/Project Managers
- Graduates identified for fast track to Senior Management

What is included within the Programme and cost?

- Plant visits to the Tokyo and Nagoya areas
- Seminar delivered by the Japan Institute of Plant Maintenance (JIPM) on the subject of 'Advances in TPM: Karakuri Kaizen, Industry 4.0 and Asset Management'
- Services of an interpreter for factory visits and exhibitions
- Services of a Black Belt TPM Consultant
- Entrance fee to the Toyota Museum
- Cultural exploration day with a guided city tour of Tokyo
- Hotel accommodation to cover standard room charge including taxes and breakfast
- Domestic travel during the study tour, including coach and train travel
- Seven breakfasts, three lunches and three dinners

How much does the programme cost?

The total cost of the programme is £4,500, however Industry Forum are offering an early bird discount scheme whereby if you reserve your place before 31st May 2019 it will cost you just £4,250. All prices are inclusive of VAT.

How many delegates places are there?

Places are strictly limited to a maximum of 20 delegates, which are allocated on a first come first served basis.
